Vegetatio **101**: 195–196, 1991.

Volume contents

Editorial: Geocoding papers in VEGETATIO 1

Brown, V. K. & A. C. Gange, Secondary plant succession: how is it modified by insect herbivory? 3
Pinty, B. & M. M. Verstraete, GEMI: a non-linear index to monitor global vegetation from satellites 15
Carretero, E. M. & A. D. Dalmasso: Litter yield in shrubs of larrea in the andean piedmont of Mendoza, Argentina 21
Bengtsson, B., Influence of aluminium and nitrogen on uptake and distribution of minerals in beech roots (*Fagus sylvatica*) 35
Breckle, S.-W. & H. Kahle, Effects of toxic heavy metals (Cd, Pb) on growth and mineral nutrition of beech (*Fagus sylvatica* L.) 43
Hagemeyer, J., A. Lülfsmann, M. Perk & S.-W. Breckle, Are there seasonal variations of trace element concentrations (Cd, Pb, Zn) in wood of *Fagus* trees in Germany? 55
Ohkubo, T., Structure and dynamics of Japanese beech (*Fagus japonica* Maxim.) stools and sprouts in the regeneration of the natural forests 65
Albert, R. & G. Pescoller-Tiefenthaler, Nutrient content and ionic pattern in beech (*Fagus sylvatica* L.) from natural stands in Eastern Austria and ecological implications 81
Erratum 97
Buchwald, R., Vegetation and dragonfly fauna – characteristics and examples of biocenological field studies 99
De Pietri, D.E., The search for ecological indicators: is it possible to biomonitor forest system degradation caused by cattle ranching activities in Argentina? 109
Glavac, V, C. Grillenberger, W. Hakes & H. Ziezold, On the nature of vegetation boundaries, undisturbed flood plain forest communities as an example – a contribution to the continuum/discontinuum controversy 123
Allison, S.K., The influence of rainfall variability on the species composition of a northern California salt marsh plant assemblage 145
Negi, G.C.S., H.C. Rikhari & S.P. Singh, Phenological features in relation to growth forms and biomass accumulation in an alpine meadow of the Central Himalaya 161
Jayasingam, T., S. Balasubramaniam & S. Vivekanantharajah, Vegetation survey of the Wasgomuwa National Park: reconnaissance 171
Retuerto, R. & A. Carballeira, Use of direct gradient analysis to study the climate-vegetation relationships in Galicia, Spain 183
